TO ADDITIONS

LLOYD'S REGISTER OF SHIPPING

REGISTER BOOKS AND OTHER PUBLICATIONS ISSUED BY THE COMMITTEE OF LLOYD'S REGISTER

LLOYD'S REGISTER OF SHIPPING, issued annually in July. This Book contains the names, classes, and detailed information concerning the ships classed by Lloyd's Register and the British Corporation Register; particulars, as far as possible, of all sea-going merchant ships in the World, and of all iron and steel ships trading on the North American Lakes, of 100 tons and upwards; particulars of ships fitted with refrigerating appliances, and a list of Owners and Managers of ships recorded in the Register Book.

The Register is published in two editions; in the Posted Edition the volumes are periodically corrected in type, and Subscribers to the Unposted Edition are supplied with periodical Supplements, for which loose binders are available.

APPENDIX TO LLOYD'S REGISTER BOOK, issued annually in January. This volume contains lists of Changes of Ships' Names; Compound Names; Ships arranged by Nationality in Tonnage Divisions; Deadweight, Capacity, Speed, &c., of Dry Cargo Ships and Tankers; Statistical Tables; lists of Shipbuilders with existing ships they have built; Marine Enginebuilders and Boilermakers; Dry and Wet Docks; Telegraphic Addresses and Codes used by shipping firms; Marine Insurance Companies; and information regarding the Corporation of Lloyd's (Committees, Agents, &c.).

LLOYD'S REGISTER OF YACHTS. Published annually in April, this volume contains in addition to the names, classes, and detailed information relating to yachts classed by the Society, the names, dimensions, &c., of other British and Foreign yachts, the particulars of which are known; a list of one-design classes, and the sail numbers of certain classes of racing yachts; also, in an Appendix, a list of various yacht clubs, with illustrations in colour of club burgees and private signals of yachtsmen; an index of signal letters; lists of yachts the names of which have been changed; yachts arranged according to tonnage; yacht builders and designers, with lists of the yachts they have built and designed; and a list of names and addresses of yacht owners.

LLOYD'S REGISTER OF AMERICAN YACHTS. This Register is published annually in May from the Society's New York Office. Copies may also be obtained on application to the Secretary, 71, Fenchurch Street, London, E.C.3, England.

This book contains the names, dimensions, and full particulars of the yachts of the United States and Canada, so far as they are ascertainable; reproductions in colour of the burgees of yacht clubs and the private signals of yachtsmen; a list of yacht clubs with the names of their officers; an index of signal letters; late names of yachts; and a list of yacht owners of the United States and Canada, with their addresses, clubs and yachts.

KEY TO THE REGISTER

(For explanation of classification symbols of the British Corporation Register, see page 4)

Columns 2 & 3

Decks. See illustrations of types of ships in Appendix. Explanations of such terms as *Shelter dk*, &c., are included in the alphabetical key, see pages 5 to 7.

Where no record of decks appears it is to be assumed that the ship has only one continuous deck.

Unless otherwise stated, it may be assumed that decks of steel ships are constructed of steel.

Special Surveys. Explanations of records of periodical special surveys will be found in the alphabetical key, see page 7. The records certify to the ship's state of efficiency *at the time of survey.*

Ports of Survey. The contractions (such as Lon, Syd, &c.) used to denote the ports at which ships have been surveyed, are explained on page 9.

Material, Rig, &c. Unless otherwise stated, all ships are of steel construction and propelled by a single screw. Explanations of contractions used to denote the rigs of ships will be found in the alphabetical key, see pages 5 to 7.

Late Names. The figures following a late name of a ship indicate the year in which the change of name took place.

Column 4

Tonnage. The tonnage recorded in the Register Book in type like that shown at the side hereof is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the ship belongs.

3101 (Gross)
2864 (Under dk.)

Columns 5 & 6

Symbols of Classification of Lloyd's Register

100A1 ....
90A1 .... Characters of ships built of Iron or Steel according to Rules of the Society since 1869. The numerals 100, 90, &c., do not signify terms of years, but the standard of classification.

A1............Character assigned to ships intended to trade within specially sheltered limits such as harbours, rivers or estuaries.

A1.............Character of Wood or Composite ships of the first class well and sufficiently equipped. The figures in column 5 prefixed to the character indicate the term of years for which the ship is at present classed, thus:—11A1, Cont 6A1, Rest 6A1. (See notes in alphabetical key, pages 5 to 7, under "Cont" and "Rest".) The figures in column 7 indicate the expired terms of years originally assigned, if on the first line, and assigned on continuation or restoration if on lower lines.

A1 ....Character of wood ships which have passed the period assigned on original Survey, or Continuation, or Restoration, and of ships not having an original character, which are found to be fit to carry dry and perishable goods. The term of years for which this character is assigned appears under the class in column 5, thus:— SSPly.53-6yrs.

1..................The figure 1 included with the characters, as printed above, signifies that the ship has equipment in accordance with the Society's requirements.

– ....This sign placed after a character, in the position usually occupied by the figure 1, indicates that the equipment of the ship—either as regards its quality or its quantity—has not been approved by the Committee for the figure 1.

✠..................This sign denotes that the ship has been built under Special Survey.

✠ ....This sign denotes that the engines or the boilers, or both (according to the record which follows), have been built under Special Survey.

——
6,53 ....A black line, with date underneath, indicates that the ship's character was expunged from the Register Book at the date specified because, on account of reported defects, the ship was not entitled to retain her classification.

——
6,53 ....A red line, with date underneath, indicates that the ship's character was expunged from the Register Book at the date specified because, on account of non-compliance with the Society's Rules as regards surveys, the ship was not entitled to retain her classification.

...
6,53 ....Three black dots, with date underneath, indicate that the ship's character was withdrawn from the Register Book at the Owner's request at the date specified.

Examined 6,53 Indicates that a general examination was held at that date, at the port indicated in red in column 6, in lieu of the overdue periodical special survey. The period of validity of such notation is 12 months, unless otherwise specified.

Examined LR 6,53 Indicates that the ship, which was classed in another Register, has been surveyed for maintenance by the Society's Surveyors at that date. The period of validity of such notation is 12 months, unless otherwise specified.

~~100A1~~ ....When a posting of loss, condemnation, casualty, &c., is made against a classed ship, the character is expunged in this manner.

with freeboard This notation under the character signifies that the freeboard assigned is a condition of the ship's class.

In the case of ships built under the 1948/9 Rules and Regulations and subsequently, this notation has been discontinued, as the scantlings of all ships under these revised Rules are based upon a specified draught.

Symbols of Classification of the late Underwriters' Registry

(Amalgamated with Lloyd's Register in 1885)

A1* A1*...Characters of Iron, Steel, or Composite ships built
A1, A1, according to the Rules of the Underwriters' Registry.

Ships classed in red were built under the inspection of the Surveyors to the Underwriters' Registry.

The figure 1 affixed to Symbols of Classification signifies the Character of Equipment.

Date of Survey. The figures under a character denote the date of the last reported examination in dry dock.

Ports of Survey. An explanation of contractions used to indicate surveying ports will be found on page 9.

A port of survey printed in black signifies the port of the last dry docking. When printed in red it is the port at which a general examination has been held.

When the ports at which the last dry docking and general examination coincide, the port recorded in red stands for both surveys.

Where the 5th column is blank, this indicates that the ship has never been classed by Lloyd's Register.

When the 5th column is left blank, except as regards the last docking date and black and red crosses, if applicable, it indicates that the character has expired, or that it has been withdrawn in default of survey or on account of non-payment of fees due.

Column 7

The letters *a*, *a*†, *a**, *b*, *b*†, *b**, &c., printed in black in column 7 indicate the Equipment Letter determined by the Rules.

The letters *a*, *a*†, *b*, *b*†, &c., in the same column are those employed to determine the fees for Special Surveys on the hull, and are not to be used to ascertain the equipment from the Rules. Where no red letter is shown, the Equipment Letter is to be used for determining the fee for a Special Survey of the hull.

The figures 1⅞, 2¼, &c., under the Equipment Letter, indicate the sizes of chain cables specially supplied or approved, which are not in accordance with those corresponding to the Equipment Letter.

Where ships are provided with special quality steel cable of a diameter less than that required by the Rules for wrought iron cable, the diameter is printed in red in column 7.

For Wood or Composite ships, the figures in column 7 indicate the term of years originally assigned but now expired, or, if prefixed by C or R, assigned on Continuation or Restoration, but now expired.

Column 8

Date of Build. In the case of Iron and Steel ships classed by Lloyd's Register, the date of build recorded in the Register Book is in accordance with the Rules. For ships not classed by Lloyd's Register, it is not possible to define whether the date of build is the date of launch or the date of completion.

In cases of ships built to Class in which the fitting out after launching was, for any reason, unduly prolonged, both the date of launch and the date of commissioning may be entered in column 8; and in such cases the first Periodical Special Survey will date from the "Commissioned" date.

Column 10

Owners. In the case of ships of British Registration, the name record
the Register Book is that of the Managing Owner, or of the fi
which the Managing Owner is a partner. When there is
Managing Owner appointed, the name of the largest sharehol
recorded; and the name of the Manager of the ship is also no
desired. In the case of colonial or foreign ships, however,
impossible to ensure that a person entered as Managing Ow
in every instance a legal owner. He may sometimes be onl
Manager of a ship as distinguished from *Managing Owner*.

Column 11

Dimensions. The Registered dimensions of ships in these columns are rec
in feet and tenths of a foot.

Length. When two lengths are recorded thus: $\genfrac{}{}{0pt}{}{315\cdot 3}{304\cdot 0}$ the upper fi
denote the length according to the Official Register of the
and the lower figures according to British practice.
In the cases of classed ships the over-all length is also rec
as and when measured by the Society's Surveyors and is indi
by the letters O.L. in parentheses, thus:—325·5(O.L.). I
cases of Italian and Finnish ships the registered length is
regarded as an over-all length except where recent changes o
have taken place and the new registered dimensions are no
available.

Breadth. When two breadths are recorded thus: $\genfrac{}{}{0pt}{}{50\cdot 9}{53\cdot 2}$ the upper fi
denote the breadth according to the Official Register of the
and the lower figures the extreme breadth to outside of pl
In the cases of some steamers of small tonnage, mostly of
coasting type, the extreme breadth over belting is record
italics thus: *25·4*.

Depth. When two depths are recorded thus: $\genfrac{}{}{0pt}{}{17\cdot 9}{25\cdot 7}$ the upper figures d

lower, the depth in hold from the uppermost continuous deck.
some countries the registered depth is the same as the mou
depth.

Trawlers. In the entries of certain trawlers, the moulded dimensions
recorded below the registered dimensions. These figures hav
most cases, been obtained from the builders.

Water Ballast. See explanations and illustrations on page 8 of key.

Column 12

gines, Boil
Furnaces, &c., are explained in the alphabetical key,
pages 5 to 7.

Machinery Numeral Fees for Complete Surveys of Machinery are based on
Machinery Numeral.

MN The Machinery Numeral printed in roman type, t
550MN, is that calculated by the formula in force at
time of classification of the machinery.

MN When the Machinery Numeral is printed in italic ty
thus *MN550*, it is one-fifth of the total horse power
which the prime movers have been approved.

Boiler pressures. The working pressures of all main and auxiliary boi
are indicated in roman characters; those of don
boilers in italics; thus 200 lb. (main or auxiliary) *100*
(donkey).

Where a donkey or auxiliary boiler is out of use but
still on board, this fact is indicated by the record
column 13 being ruled through with a thin red line.

Column 14

Moulded Depth. The moulded depth of an Iron or Steel ship is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the ship, to the top of the keel and the bottom of the frame at the middle line. In Wooden and Composite ships the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the ship amidships to the lower edge of the rabbet of the keel.

In Wooden and Composite ships where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line of the flat of the bottom cuts the keel. Fractions of an inch are not recorded.

Freeboard. The freeboard entered in this column is the Summer freeboard measured from the deck line at the freeboard deck to the centre of the Load Line disc in accordance with the International Convention respecting Load Lines.

The freeboard and corresponding draught are entered for all ships built under the 1948/9 and subsequent Rules irrespective of whether the freeboard is assigned by the Committee. In the case of ships built under previous Rules the freeboard and draught are entered only when the freeboard is assigned by the Committee or when the freeboard is a condition of the ship's class.

Draught. The "corresponding draught" for all cases recorded prior to August, 1923, is the calculated draught of water from bottom of keel to centre of load line disc and fractions of an inch are not recorded. Subsequent to that date the actual draught to the nearest quarter of an inch, as supplied by the respective Shipbuilders, is recorded.

◊ In the case of ships built and classed in accordance with the 1948/9 Rules and Regulations and subsequently, the symbol ◊ indicates that the draught for which the scantlings have been approved is less than the maximum which would otherwise be permitted by geometrical factors alone.

raffin Motor	13	Internal combustion engine, using, as fuel, refined oil with a flash point higher than 73° F., such as Paraffin Oil, Kerosene, Solar Oil, etc.
trol Motor	13	Internal combustion engine using, as fuel, highly volatile oils such as Benzoline, Gasoline, Petrol, etc.
	13	Plain furnaces, with number prefixed.
	2	Part.
d	3	Paddle Steamer.
l	3	Polacre (rig).
B	13	Press Boiler or other pressure vessel used in connection with the preparation of oil, meal, etc., in floating whale-oil factory.
BS	5, 6, 7	Press Boilers surveyed, with date, denoting that the boilers were found, upon inspection at that time, to be in good condition.
		Q
	11	Raised Quarter Deck.
	13	Quadruple expansion engines.
d	13	Engines altered to Quadruple expansion, with date.
ad	3	Four screws.
		R
	13	Shell, longitudinal stays, end plates, furnaces, and combustion chamber of boiler made of steel; screw stays of iron.
	7	Placed before figures signifies the term of years for which the class of the ship had been Restored, but which is now expired.
	15	Ship classed in the Record of the American Bureau of Shipping.
	15	Ship classed in the Record of the American Bureau of Shipping, but formerly classed in Lloyd's Register.
AD	11	Raised after deck.
f.Mchy	2–3	Ship fitted with Refrigerating Machinery not classed with Lloyd's Register. See List of Refrigerated Ships.
l.Mchy.	5	Ship fitted with Refrigerating Machinery classed with Lloyd's Register. See List of Refrigerated Ships.
st.	5	Restored. Thus, Rest.10A1 from 53 Lon. denotes that the ship was restored on the A character for 10 years from 1953, and that the Survey was held at London.
	13	Ribbed furnaces, with number prefixed.
FD	11	Raised Fore Deck.
t.	13	Engines fitted with reheaters.
of	2	Ship built under a roof.
		S
	13	Simple expansion engines.
	14	Summer Freeboard.
	13	Shell, stays, end plates, furnaces, and combustion chamber of boiler made of steel.
	2	Sheathed with Wood.
lted	3	Ship salted.
lted†	3	The dagger signifies that the ship's beams have *not* been salted.
	3	Ship.
	5 & 13	Starboard.
	7*	(With date.) Date when *Starboard* tail shaft was last seen.
	7*	Starboard aft screwshaft.
	7*	Starboard forward screwshaft.
3	13	Single-ended Boilers, with number prefixed.
C.DA	13	With number prefixed thus : 2S.C.DA, 2-stroke cycle, double acting.
C.SA	13	With number prefixed, thus : 4S.C.SA, 4-stroke cycle, single acting.
	3	Screw.
	3	Smack.
	3	Sloop.
t.	3	Spritsail.
pt)	13	Boiler(s) fitted with Superheater(s).

Abbreviation or Sign.	No. of Column.	Signification.
Sq		Square Rigged.
Sr		Schooner.
Sw	3	Snow.
Shade dk	3 & 5	Deck of light construction over openings in ship's sides.
Shelter dk	3	The term Shelter Deck indicates that a tonnage opening is fitted in the uppermost continuous deck. In such ships the record of decks appears in Column 3 as "1*Dk&Shelter dk*" in the case of a two deck ship, and "2*Dks&Shelter dk*" for a three deck ship, and so on. For ships built prior to the 1922 Rules, the term Shelter Deck does not necessarily indicate that a tonnage opening is fitted.
Spar dk	3 & 5	Built according to Rules for Spar-Deck Ships.
SR	13	Single Reduction Gear fitted between Main Engines and Screw Shafting.
ss	3	Special Survey of Iron or Steel Ships. Prior to 1st April, 1946, the Special Surveys of ships classed by Lloyd's Register were recorded thus: *ss*Nwc.No.1–45; *ss*Liv.No.2–45; *ss*Gls.No.3–10,45. A "Second Special Survey No. 3", indicated thus: *ss*Hpl.2ndNo.3–1,46, included the drilling of the shell plating. Periodical Special Surveys held after 1st April, 1946, are not recorded as Nos. 1, 2 or 3, but have notations indicating only the date and place of such survey, thus: *ss*Lon.–4,53. The notation *ss*Lon.–4,53(Dr.) indicates that this Special Survey has included the drilling of the shell plating to ascertain its thickness.
ss(P)	3	See note under (P).
SS	3	Special Survey of Composite ships, with date.
SS	5	Special Survey. Date in red affixed denotes that the ship has been surveyed at that time in accordance with the Rules for Wood Ships, and the number of years indicates the term for which the ship remains on this character (thus, SSSld.53-8yrs.).
(*Stl*)	3	Steel—material of Decks.
SubSig.	2	Submarine signalling apparatus.
		T
t	11 & 12	Tons.
T.	13	Triple expansion engines.
trB	3	Tiers of Beams with number of same prefixed (thus 3*trB*), with or without decks laid on them.
Trp	3	Three screws.
Tpd	13	Engines altered to Triple Expansion, with date.
Trb	3	Trabacolo.
Twin	3	Twin screws.
		U
U	3	Upper deck.
		V
V	15	Ship classed in the Bureau Veritas.
V †	15	Ship classed in the Bureau Veritas, but formerly classed in Lloyd's Register.
VB	13	Vertical Boiler.
		W
WB	11 & 12	Water ballast. See illustrations on page 8.
Well deck	2 & 3	A Well-deck Steamer is one having a forecastle, and a long raised quarter deck or a poop joined to a bridge house, thus leaving the main deck exposed between the bridge front and the end of the forecastle.
ws	3	Sheathed with Wood (relating to Decks).
WTB	13	Water Tube Boilers.
		Y
Yl	3	Yawl.
Yt	2	Yacht.

A List of Surveying Ports will be found on page 9.

N.B.—When part of the record of Water Ballast is expunged in red ink, thus :—*DBa90'f120'~~uE&B46'~~*&c., it signifies that the ship is fitted with tanks to the extent named, but at the date of the last survey the expunged portion was not being used for the purpose of Water Ballast, and the pipes, &c., thereto have been suitably altered.

A notation of "Carrying oil (or oil fuel) F.P. above 150°F. in DB & DT" in columns 5, 6 and 7 indicates that the ship is fitted for carrying oil (or oil fuel) in double bottom and deep tanks.

TABLE EXPLICATIVE DU REGISTRE

(Pour l'explication des symboles de classification du Registre de la " British Corporation," voir page 14)

Colonnes 2 et 3

Ponts.	Voir les dessins des différents types de navires dans l'Appendice. Les explications des termes tels que *Shelter dk,* etc., sont fournies dans la Table Explicative, voir pages 15 à 18. Lorsqu'il n'est pas fait mention de ponts, il y a lieu d'assumer que le navire n'a qu'un seul pont continu. Lorsqu'aucun renseignement n'est donné à ce sujet, l'on peut assumer que les ponts des navires en acier sont en acier.
Visites Périodiques.	Les abréviations telles que (Lon, Syd, etc.), employées spéciales se trouve dans la Table Explicative, voir page 17. L'enregistrement indique la condition du navire à l'époque de la visite.
Ports de Visite.	Les abréviations telles que (Lon, Syd, etc.), employées pour indiquer les ports où les navires ont été inspectés, sont expliquées à la page 20.
Matériaux, Gréement, etc.	Sauf avis contraire, tous les navires sont construits en acier et propulsés par une seule hélice. Les abréviations employées pour spécifier le gréement des navires sont expliquées dans la Table Explicative, voir pages 15 à 18.
Anciens Noms.	Les chiffres à la suite d'un ancien nom de navire indiquent l'année pendant laquelle le changement de nom a eu lieu.

Colonne 4

Tonnage.	Le tonnage qui figure sur le "Lloyd's Register Book" en caractères comme ci-contre, est à part quelques rares exceptions, le tonnage officiel mesuré d'après les lois du pays auquel le navire appartient.	3101 (Total) 2864 (Sous le pont) 1994 (Net)
	Pour quelques navires étrangers, le tonnage qui figure a été mesuré d'après la méthode Anglaise, et est reconnu par la loi Anglaise. Dans ce cas le fait est mentionné par l'emploi de caractères italiques, comme ci-contre	*3101* (Total) *2864* (Sous le pont) *1994* (Net)

Colonnes 5 et 6

Marques de Classification du Lloyd's Register

100A1 .... 90A1	Cotes des navires en fer ou en acier, construits conformément aux règlements de la Société depuis 1869. Les nombres 100, 90, etc., n'indiquent pas une période d'années, mais le type de classification.
A1........................	Cote attribuée aux navires destinés à naviguer dans des parages abrités, tels que ports, rivières et estuaires.
A1....................	Première cote des navires en bois ou composites dont l'armement est bon et suffisant. Les chiffres qui précèdent la cote, colonne 5, indiquent le nombre d'années pour lesquelles le navire a été coté, ainsi :—11A1, Cont 6A1, Rest 6A1. (Voir "Cont" et "Rest" dans la Table Explicative, pages 15 à 18.) Les chiffres dans la colonne 7 indiquent les périodes expirées pour lesquelles les navires avaient été cotés. A la première ligne ces chiffres indiquent la période originelle, aux lignes suivantes les périodes de continuation ou de rétablissement.
A1	Cotes des navires en bois pour lesquels les périodes assignées soit originellement, soit par Continuation ou par Restauration sont expirées, ou cote des navires qui n'ont jamais eu de cote originelle mais qui sont jugés aptes à transporter des marchandises sèches et périssables. Le nombre d'années pour lesquelles la cote a été assignée figure sous la cote dans la colonne 5, ainsi :— SSPly.53-6yrs.
1........................	Le chiffre 1 imprimé comme ci-contre et faisant partie de la cote, indique que le navire a un armement conforme aux exigences de la Société.
—	Ce signe à la suite d'une cote, à la place occupée par le chiffre 1, indique que l'armement du navire ne repond pas aux exigences de la Société, soit comme qualité, soit comme quantité.
✠	Ce signe indique que le navire a été construit sous surveillance spéciale.
✠	Ce signe indique que les machines ou les chaudières, ou toutes les deux (suivant l'annotation dont il est suivi) ont été construites sous surveillance spéciale.
——................. 6,53	Une ligne noire avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de défectuosités signalées.
—— 6,53	Une ligne rouge avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de dérogation aux règlements de la Société en ce qui concerne les visites.
... . 6,53	Trois points noirs inséré avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book" à la demande de l'armateur à la date indiquée.
Examined 6,53	Signifie qu'une inspection générale a eu lieu à cette date, au port indiqué en rouge dans la colonne 6, en remplacement de la visite périodique spéciale échue. La période de validité de cette inspection est de 12 mois, sauf mention contraire.
Examined LR 6,53	Signifie que le navire, qui était coté auprès d'un autre Registre, a été soumis à une visite d'entretien par les Inspecteurs de la Société à la date indiquée. La période de validité d'une telle annotation est de 12 mois, à moins de mention contraire.

~~100A1~~ ......Quand un navire coté est mentionné comme perdu, condamné ou ayant tout autre accident, etc., la cote est rayée comme ci-contre.

with freeboard....Cette mention sous la cote indique que le franc-bord assigné est une condition de la cote du navire.

En ce qui concerne les navires construits d'après les Règlements de 1948/9 ou plus récemment, on a cessé de faire usage de cette mention, étant donné que d'après ces Règlements les échantillonnages de tous les navires se basent sur un tirant d'eau spécifié.

Marques de Classification de l'ex Underwriters' Registry

(Réuni avec le Lloyd's Register en 1885)

A1* **A1*** Cotes des navires en fer, en acier ou composites, construits
A1, **A1,** conformément aux règlements de l'Underwriters' Registry.

Les navires cotés en rouge ont été construits sous la surveillance des Inspecteurs de l'Underwriters' Registry. Le chiffre 1 à la suite des marques de classification indique la cote de l'armement.

Date de Visite. Les chiffres sous une cote indiquent la date de dernière visite en cale sèche connue.

Ports de Visites. Les abréviations employées pour indiquer les ports de visites sont expliqués à la page 20.
Un port de visite imprimé en noir indique le port de la dernière visite en cale sèche. Quand il est imprimé en rouge, il s'agit du port auquel une inspection générale a été effectuée.

Lorsque la dernière visite en cale sèche a eu lieu dans les mêmes ports que l'inspection générale, le port imprimé en rouge se réfère aux deux visites.

Quand la 5me colonne est laissée en blanc, cela indique que le navire n'a jamais été coté par le "Lloyd's Register." La 5me colonne laissée en blanc, sauf en ce qui concerne l'époque de la dernière visite en cale sèche et les croix noires et rouges, s'il y a lieu, indique que la cote est expirée ou bien qu'elle a été rayée à défaut de visite ou par suite du non-paiement des honoraires dûs.

Colonne 7

Les lettres *a*, *a*†, *a**, *b*, *b*†, *b**, etc., en noir dans la colonne 7, indiquent la lettre d'armement d'après les règlements.

Les lettres *a*, *a*†, *b*, *b*†, etc., en rouge dans la même colonne, servent à déterminer les honoraires pour les visites périodiques de coque, et ne doivent pas être utilisées en vue d'établir l'armement conformément aux règlements. Lorsqu'il n'y a pas de lettre rouge, la lettre d'armement sert à déterminer les honoraires pour les visites périodiques de la coque.

Les chiffres 1⅞, 2¼, etc., au-dessous de la lettre d'armement, indiquent la grandeur de câble-chaîne spécialement fournie ou approuvée et non-conforme à celle correspondant à la lettre d'armement.

Lorsqu'un navire est pourvu d'une chaîne d'acier de qualité spéciale d'un diamètre inférieure à celui exigé par les Règlements pour les chaînes en fer forgé, sont diamètre est imprimé en rouge dans la colonne 7.

Pour les navires en bois ou composites les chiffres dans la colonne 7 indiquent les périodes, actuellement échues, pour lesquelles les navires avaient été cotés. Quand ils sont précédés de C ou R, ils indiquent les périodes, actuellement échues, pour lesquelles les cotes avaient été continuées ou rétablies.

Colonne 8

Date de Construction. Dans le cas des navires en fer et en acier classés au Lloyd's Register. la date de construction inscrite dans le Registre est conforme aux Règlements. Pour les navires non cotés par le Lloyd's Register, il n'est pas possible de spécifier si la date de construction est celle du lancement ou celle de l'achèvement des travaux.

Pour les navires construits sous la surveillance de la Société et dont l'achèvement après le lancement se trouve, pour une raison ou une autre, retardé de façon excessive. la date du lancement, ainsi que la date de la mise en service, figurent dans la colonne 8; dans ce cas, la date de la première inspection spéciale est calculée à partir de la mise en service.

Colonne 10

Armateurs. Pour les navires de la Grande Bretagne et de l'Irlande, le no
qui figure sur le "Lloyd's Register Book" est celui de l'armateu
gérant, ou celui de la Société dont l'armateur-gérant fait parti
Lorsqu'il n'y a pas d'armateur-gérant, le nom qui figure est cel
du plus gros actionnaire et le nom du gérant figure aussi, si on
demande. Pour les navires coloniaux et étrangers, il n'a
pas possible de certifier qu'une personne mentionnée comm
étant armateur-gérant est, dans chaque cas, l'armateur léga
Dans certains cas la personne dont le nom figure peut n'êt
que *gérant*, ce qui est absolument distinct *d'armateur-géran*

Colonne 11

Dimensions. Les dimensions de douane des Navires. dans ces colonnes so
indiquées en pieds et en dixièmes de pieds.

Longueur. Lorsque deux longueurs sont mentionnées, ainsi $\frac{315\cdot3}{304\cdot0}$, le
chiffres supérieurs indiquent la longeur d'après le Registr
officiel national du navire et les chiffres inférieurs la longueu
d'après la pratique anglaise. Dans le cas des navires classés, l
longueur hors tout est aussi mentionnée, quand et comm
mesurée par les Inspecteurs du Lloyd's Register, et est indiqué
par les lettres O.L. entre parenthèses, ainsi 325·5(O.L.). Dans l
cas des navires italiens et finlandais, la longueur de douane es
à considérer comme une longueur hors tout, sauf lorsqu'u
récent changement de nationalité a eu lieu et que les nouvelle
dimensions de douane ne sont pas encore connues.

Largeur. Lorsque deux largeurs sont mentionnées, ainsi $\frac{50\cdot9}{53\cdot2}$, les chiffre
supérieurs indiquent la largeur d'après le Registre officie
national du navire et les chiffres inférieurs la largeur extrêm
allant jusqu'au côté extérieur du borde. Dans le cas de quel-
ques vapeurs de jauge peu importante et principalement d
cabotage, la largeur extrême, y compris la ceinture, est men-
tionnée en italique comme suit : *25·4*

Creux. Lorsque deux creux sont mentionnés, ainsi $\frac{17\cdot9}{25\cdot7}$, les chiffre
supérieurs indiquent le creux d'après le Registre officiel national du navire et les chiffres inférieurs le creux dans la cale depuis le pont continu supérieur. Dans quelques pays, le creux du Registre est le même que le creux sur quille.

Chalutiers. Dans le cas de certains chalutiers, la longueur de l'etrave à l'étambot à la flottaison. la largeur hors membres et le creux sur quille sont insérés en-dessous des dimensions de douane. Dans la plupart des cas ces chiffres ont été fournis par les chantiers de construction.

Water Ballast. Voir explications et dessins à la page 19 de la Table Explicative.

Colonne 12

Port d'Armement. Le Port d'Armement est indiqué en caractères romains, fondis qu'un port inséré en italique est un port d'attache, en tant que différent du port d'armement.

Colonne 13

Toutes les abréviations employées se rapportant aux Machines, Chaudières, Foyers, &c., sont décrites dans la Table Explicative, voir pages 15 à 18.

Les honoraires pour visites périodiques de machines sont calculés d'aprés le "Nombre" de la machine.

"Nombre" de la machine MN Le "Nombre" de la machine, lorsqu'il est imprimé en caractères romains, ainsi : 550MN, a été calculé suivant la formule en vigueur au moment de la classification de la machine.

MN Lorsque le "Nombre" de la machine est imprimé en italique, ainsi : *MN550*, il représente un cinquième de la puissance totale en chevaux pour laquelle les machines motrices ont été approuvéses.

Pressions des Chaudières. Les pressions de travail de toutes les chaudières principales et auxiliaires sont indiquées en caractères romains; celles des chaudières de petit cheval en italique, ainsi : 200lb. (principales et auxiliaires); *100lb.* (de petit cheval).

Lorsqu'une chaudière de petit cheval se trouve hors de service, bien que toujours à bord, le fait est indiqué en rayant les caractéristiques de la colonne 13 au moyen d'un trait rouge.

Colonne 14

Creux sur quille. Le creux sur quille pour les navires en fer et en acier, est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur sur le coté et au milieu de la longueur du navire, jusqu'à hauteur de la rencontre de la face inférieure de la membrure avec le dessus de la quille sur la ligne médiane. Pour les navires en bois et composites, le creux sur quille est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur jusqu'à hauteur de l'arête inférieure de la rablure de quille. Pour les navires en bois et composites dont les parties inférieures sont frégatées (lorsqu'un navire est pourvu par exemple de galbords épais) le creux sur quille n'est alors calculé que jusqu'à hauteur de l'intersection de la ligne prolongée des fonds avec la quille. Les fractions d'un pouce ne sont pas mentionnées.

Francbord. Le francbord figurant dans cette colonne est le francbord d'été mesuré depuis la ligne règlementaire du pont de francbord jusqu'au centre du disque de la ligne de charge, conformément à la Convention Internationale sur les Lignes de Charge. Le francbord et le tirant d'eau correspondant sont insérés pour tous les navires construits suivant les Règlements de 1948/9, ou des règlements plus récents, que le francbord ait été assigné ou non par le Comité de la Société.

Pour les navires construits suivant des Règlements antérieurs, le francbord et le tirant correspondant ne figurent au Registre que lorsque le francbord a été attribué par le Comité ou qu'il constitue une des conditions de la cote.

Tirant d'eau. Le "tirant d'eau correspondant," pour tous les cas mentionnés avant août, 1923, est le tirant d'eau calculé depuis le fond de la quille jusqu'au centre du disque de la ligne de charge; et les fractions de pouce ne sont pas mentionnées. Après cette date, le tirant d'eau actuel, à un quart de pouce près, et tel qu'il a été indiqué par les constructeurs de navire, est mentionné.

◊ Dans le cas des navires construits conformément aux Règlements de 1948/9 ou plus récemment, de symbole ◊ signifie que le tirant d'eau pour lequel les échantillonnages ont été approuvés est inférieur au maximum qui aurait été permis en ne tenant compte que des données géometriques.
